## Indiana WIC Presents Certified Lactation Specialist Course

### 45 CERPs and Nursing CEUs

The Certified Lactation Specialist Course is designed for the aspiring lactation consultant or nurses, physicians, midwives, dieticians, breastfeeding assistants or others desirous of improving their knowledge base and skills in working with the breastfeeding dyad. All areas included on the IBLCE exam are addressed. The 5 day course provides the needed number of continuing education in lactation to qualify to sit for the IBLCE exam. Lactation management skills are taught through practical application of scientific principles. The course is continuously updated in response to changes within the profession and the rapidly expanding body of scientific knowledge. Certification as a lactation specialist is achieved through attendance at the entire course, completion of assigned homework and readings during the course, and passing the of the end of course exam on the last day.

This certification is a stepping stone to the IBCLC credential. It is hoped that those who attend this course ultimately go on to become board certified, although that is not a requirement. During this very practical course, participants will be taught how to use appropriate counseling skills, how to teach mothers and families, and most importantly, how to function hands-on as a clinician.

Lactation  
Education  
Consultants
